

LIGHTWEIGHT TECHNOLOGIES FOR AUTOMOTIVE SUPPLIERS

Join **ELCA** and **ACMA** in the first introductory webinar on lightweight technologies for the production of auto parts and components.

May 25th 2021

14:30-16:30h Indian time (GMT+5.30) ; 11-13h (GMT+2)

The webinar will focus on the Indian market, considering the most relevant technological needs and the current policy context, demonstrating a knowledge transfer from leading European experts to India.

The main priorities to be discussed in the webinar are:

- ▶ Casting and forging
- ▶ Plastics and rubber
- ▶ Sheet metal pressed parts (including sub-assemblies)
- ▶ Composites

For each priority, use cases applicable to SMEs adopting lightweight technologies will be presented and discussed with ELCA experts from academia and industry.

Webinar Agenda:

- Introduction to lightweight technologies for automotive suppliers
- Relevant use cases of applicability for SMEs presented by ELCA experts in the domains of casting and forging, sheet metal, plastics and rubber, and composites.
- Preliminary assessment of needs of ACMA members.
