

Improvement Reporting Information System Sweden AB Provider of the IRIS system & services.

We adapt the system to you. Instead of the other way around.

From IRIS you can always expect client-individual applications. You pick the functions you really need and attach them to our or your existing system.

Lessons Learned

Shares knowledge and provides inputs to problem solving

Management of Change:

Take care of all elements in a change process, to ensure that a change will be a success

Reports

Thanks to the step-by-step wizard, writing reports have never been easier.

Risk Assessment

Identify potential hazards before they happen

Search & Analysis

Reports are stored in IRIS' database. Analysis can easily be performed by using its search function

Governing Documents

IRIS supports all handling of the Governing Documents, always up to date and accessible

Inspections & Audits

All kinds of audit reports accessible in one place

KPI Statistics:

Present KPI-data for benchmark of KPI's and safety performance across the fleet.

Certificates:

Gain a comprehensive view of all the vessels certificates

Discussions:

Keep workflow and discussions streamlined.

Experience Transfer:

Compare your own experience with similar events in the shipping industry.

Forms & Checklists:

Plan and follow up your checklists, inspections and meetings with pre-built forms

Actions:

Structured and prioritized action lists ready to send out of the box

Permits:

Simplify the permission process with simple wizards and a logical work flow
