

***We have the pleasure of inviting you to our
NextBioForm Online Course:***

**Bench top and large scale methods to characterize
protein solution formulations**

(Protein formulation in solution part II)

25-26 May 2021

Dear all,

Welcome to the second part of our January course on *Protein formulation in solution*. This time we focus on characterization.

Please mark your calendar, more information will soon be available.

Target audience

This course is aimed at those who have some prior knowledge about protein formulation and want to have an overview of several of the existing methods to characterize the physical and chemical characteristics of protein. Methods that will be included are scattering, calorimetric and spectroscopy techniques.
