

PatentRenewal.com is a Danish fintech company who are experts in renewing patents. We simply love innovators and want to help them foster great ideas in the world of intellectual property. We see a need for transparent and easy-to-use digital tools in an industry suffocated by traditional, complicated and expensive solutions.

PatentRenewal.com revolutionizes the process of IP renewals (including patents, designs, utility models and more) by not only **digitizing** all process elements but also by **eliminating inflated costs**, such as inefficient transfer flows, inflated currency exchange rates, and, in jurisdictions where they are not necessary, redundant local attorneys; all at **the world's most affordable price**.

As the biggest patent renewal service provider in the Nordics, we provide our **1000+ customers** with a transparent and easy-to-use digital platform where they can easily renew their patents within a few clicks **globally, saving on average 50%** on their annual fees.

We have complete trust in our service, and we have **never** been presented with an invoice more cost-effective than ours. Therefore, we will be happy to match any offer that you present to us that has a lower total price per renewal than ours.
